                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      g
                                                                                            ਨ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    The present sequence encodes human vascular endothelial growth factor-2 (VEGF-2). The VEGF-2 polypeptides have activities similar to VEGF-The VEGF-2 polypeptides stimulate and the stimulate endothelial cells, stimulate endothelial cells, settimulate angiogenesis, decrease blood pressure, and increase blood flow. The polymucleotides and polympeptides can be used for preventing, treating or ameliorating a medical condition. The VEGF-2 polypeptides or polympetides or inhibiting the proliferation, of the immune system, by activating or inhibiting the proliferation, of immune cells. The etology of these immune deficiencies or disorders may be genetic, somatic, such as cancer or some untoinfamune disorders, acquired (e.g. by chemotherapy or toxins), or autoinfamune disorders, acquired (e.g. by chemotherapy or toxins), or infectious. Examples of immunologic deficiency syndromes include blood protein disorders, ataxia telangiectasia, common variable immunodeficiency, pigeorge syndrome, lymphopenia, phagocyte adhesion deficiency syndrome, lymphopenia, phagocyte adhesion deficiency syndrome, lymphopenia, phagocyte bactericidal dysfunction, severe combined immunodeficiency (SCIDs), wiskott-Aldrich disorder, anemia, thrombocytopenia, or hemoglobinuria. They can also be used to modulate emostatic or thrombolytic activity. Similarly allergic reactions and conditions such as asthma (particularly allergic reactions and conditions such as asthma at treated
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 240

The mucleic acid is useful for producing a host cell by transducing, transforming or transfecting a host cell with the DNA and for treating a patient having chronic limb ischaemia or ucidmune myocardial ischaemia, or a disease or disorder selected from autoimmune disorders (e.g. rheumatoid arthritis, dermatitis), allergic reactions or conditions (e.g. asthama), organ rejection, inflammatory conditions (e.g. crohn's disease), hyperproliferative disorders (e.g. duscher's disease), diseases due to viral, batterial, fungal or parasitic infection, cardiovascular disorders (e.g. cardiomyopathy), arrhythmia, heart valve diseases, aneurysms, atterial occlusive disorders and embolism. This
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Human; vascular endothelial growth factor 2; VEGF-2; gene; ss; pVGI.1; chronic limb ischaemia; myocardial ischaemia; autoimmune disorder; allergic reaction; organ rejection; inflammatory condition; arrhythmia; hyperproliferative disorder; viral infection; bacterial infection; fungal infection; parasitic infection; cardiovascular disorder; embolism; heart valve disease; aneurysm; arterial occlusive disorder; gene therapy.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Isolated nucleic acid having expression vector construct with vascular endothelial growth factor-2 insert, useful for treating chronic limb ischemia or myocardial ischemia, autoimmune disorders and allergic conditions.

New isolated polynucleotide encoding an antibody which inhibits a VEGF-2 polypeptide, useful for diagnosing, treating or preventing diseases associated with aberrant VEGF-2 expression or function, e.g. cancer or inflammation.

Disclosure; Fig 1; 425pp; English.

The invention relates to an isolated polymucleotide encoding a first antibody at least 95-100% identical to a second antibody comprising an amino acid sequence selected from at least one, two or three CDR region(8) of a VH or VL domain where the first antibody is a VEGF-2 polymetric two or three CDR immunospecifically inhibits a VEGF-2 polymetric. The isolated polymucleotide is useful in diagnosing, treating preventing, prognosing, aneliorating or monitoring diseases associated with aberrant VEGF-2 or VEGF-2 or

```
This invention describes a novel isolated polymuclectide encoding a first antibody comprising an amino acid sequence selected from at least one, two or three complementarity determining (CBT) region(s) of a VH and/or VL domain of a second antibody that immunospecifically binds to a vascular endothelial growth factor (VBGF)-2 polypeptide. The products of the invention have cytostatic, cardiovascular, antirhemmatic, vulnerary, antializergic immunosuppressive, dermatological, antipalerary, antializergic immunosuppressive, dermatological and antipsoriatic activity. The polymuclectide is useful in diagnosing, treating, preventing, prognosing, ameliorating or monitoring diseases alloger-2 or VBGF-2 or VBGF-2 receptor function, such as cancer and other products (CBCF-2 or VBGF-2 or VBGF-2 receptor function, such as cancer and other products diseases, autoimmune diseases (e.g. rheumatoid arthritis, or proliferative diseases, autoimmune diseases (e.g. rheumatoid arthritis, systemic Lupus Brythematosus, allergies), diabetic retinopathy or the invention may also be used to simulate angiogenesis, wound healing, and promoting vascular tissue repair. The polymuclectide and polypeptide may also be used to simulate angiogenesis, wound healing, may also be used for in vitro purposes related to scientific research, synthesis of DNA and manufacture of DNA vectors and for the production of diagnostics and therapeutics e.g. one therapy and in vaccines to treat

The invention relates to vascular endothelial growth factor (VEGF)-2 antibodies are useful for treating, preventing or ameliorating a disease or disorder, such as inflammatory diseases or disorders, tumour tumour unetastasis, breast cancer, proliferative disorders, tumour unetastasis, breast cancer, brain cancer, prostate cancer, colon cancer, lymphangioma, an infectious disease, Kapoai's sarcoma, an autoimmune diseases, rheumatoid arthitis, psoriasis, diabetic retinopathy, a disease or disorder associated with aberrant VEGF-2 (receptor) expression, or a disease or disorder antibody is also useful for detecting, diagnosing, prognosing, or monitoring cancers and other hyperproliferative disorders. VEGF-2 is also used in gene therapy. The present sequence is human VEGF-2 cDNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       120

                                                                                                                                                                                                                                                                                                                                                                                            endothelial growth factor (VEGF)-related protein (VPP) (AAM13833), a protein that binds to, and stimulates the phosphorylation of, the protein that binds to, and stimulates the phosphorylation of, the excracellular domain of the Flt4 receptor and the For region of the IgG heavy chain was expressed in 293 cells and used to screen for membrane-linked VRP by fluorescent-activated cell sorting. A positive cell line, glioma 661, was identified and a cDNA library from it was screened with probes (see also AATS9931-22) based on an EST sequence (AATS9930) sequence similar to VEGF to obtain clone VHI.4. The clone can be used to produce recombinant VRF, and diagnostically for tissue-specific typing
                                                                                                                                                                                                                                                                                            protein similar to vascular endothelial growth factor - used to e.g. wounds, tumours, rheumatoid arthritis, Kaposi's sarcoma etc.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  GICCTICCACCAIGCACTIGCIGGGCITCTICTCTGTGGCGTGTTCTCTGCTGCCGCTG

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   This cDNA clone codes for human VEGF-C (AAW00932), a novel ligand that binds specifically to human F1t4 receptor tyrosine kinase (VEGFR-3), etimulating phosphorylation of the receptor, and which can be used to modulate growth of endothelial cells and for diagnosis of endothelial cell diseases. The clone was isolated from a PC-3 prostatic adenocarcinoma cell (AYCC CRL 1435) cDNA library by PCR amplification and has been cloned into pcDNAI to form plasmid pFLT4-L (ATCC 97231). The human VEGF-C gene is located on chromosome 4q34 and contains 6 introns (see AAT84303-14). The insert from the human clone was used to isolate mouse (see AAT84277) and quail (see AAT84300) VEGF-C sequences. It can also be used to produce recombinant VEGF-C polypeptides in host cells and to provide probes for screening endothelial cell diseases. Antisense concluse that block the receptor can be used to control endothelial cell proliferation, e.g. lymphangioma or metastatic cancer. The promoter sequence (AAT84278) is also claimed

The vascular endothelial growth factor C (VEGF-C) polypeptides have activities affecting growth and migration of vascular endothelial cells, promoting growth of lymphatic endothelial cells and lymphatic vessels, increasing vascular permeability, and affecting myelopoiesis. The products can be used for stimulating angiogeneses, for inhibiting angiogenesis, for stimulating lymphangiogenesis, treatment or prevention of inflammation, oedema, elephantiasis, or Mirroy's disease. They can also be used for modulating the growth of endothelial cells. They can also be used for modulating the growth of endothelial cells. They can also be used for stimulate lymphocyte production and maturation, and to promote or inhibit trafficking of leucocytes between tissues and lymphatic vessels or to affect migration in and out of the thymus
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    CECTECTCCCGGGTCCTCGCGAGGGGCCCGCCGCCGCCGCCGCCGCCTTCGAGTCCGGACTCG

VBGF-C has the ability to stimulate re-endothelial sation of an injured blood vessel, without significant stimulation of smooth muscle call proliferation. It can bind to and stimulate VBGFR-2 (vascular endothelial growth factor receptor) and/or VBGRP-3 phosphorylation in cells that express such receptors. An anti-restenosis agent comprising either a VBGF-C gene or protein is used in a method to reduce or prevent restenosis and stenosis of a blood vessel following vascular trauma e.g., cardiovascular surgery and percutaneous transluminal coronary angioplasty
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                human VEGF-C protein" and active vascular endothelial growth
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    vascular endothelial them.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            880
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    940
                                                                                                                                            Screening a human subject for increased risk of developing a lymphatic disorder, comprises assaying a nucleic acid to determine a mutation altering the sequence of a vascular endothelial growth factor receptor-3.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           9
                                                                                                                                                                                                                                                    The present sequence is the coding sequence for the human vascular endothelial growth factor C (VEGF-C). It was used to demonstrate the methods of the invention, which involve the screening of individuals to determine which vascular endothelial growth factor receptor 3 (VEGFR-3, also known as Flt4 or fms-like tyrosine kinase 4) allelss they possess and thus their likelihood of developing hereditary lymphoedema. Conditions associated with lymphoedema include Milroy-Nonne syndrome, which is early onset lymphoedema and lymphoedema praecox, which is late

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         The present invention relates to a method for screening a human subject for an increased risk of developing a lymphatic disorder e.g. hereditary lymphedoema. The method comprises assaying nucleic acid of a human or subject to determine a presence or an absence of a mutation altering the sequence or expression of vascular endothelial growth factor receptor-3 (VEGFR-3)/fme-like tyrosine kinase 4 (Filt4) allele (see AAG68952 and AB3764) and determining an increased risk of developing lymphatic disorder from presence or absence of the mutation. The presence of a mutation altering the encoded amino acid sequence or expression of at least 1 VEGFR-3 allele in the nucleic acid correlates with an increased risk of developing a lymphatic disorder. Treatment for hereditary lymphatic disorder. Treatment for hereditary lymphatic disorder. Treatment for hereditary lymphatic acid correlates with an increased risk of developing a Lymphatic disorder. Treatment for hereditary sendothelial growth factor C (VEGF-C) and vascular endothelial growth factor C (VEGF-C) and vascular endothelial growth factor C (VEGF-C) and vascular endothelial growth factor C WEGF-C sequence is the coding sequence for VEGF-C
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
